

Wai Phyo Oo

Backend-Focused Full-Stack Developer

Yangon, Myanmar | eulen9t5@gmail.com | Telegram: @nighteule39 | GitHub: github.com/Eulean | Remote / work from home

PROFESSIONAL SUMMARY

Backend-focused full-stack developer with hands-on experience building business workflow systems using .NET, React, SQL databases, and Go. Experienced in enterprise trade, e-commerce registration, reporting, authentication, and document workflow systems, plus complete public projects such as a restaurant POS platform. Strongest in API development, database-backed workflows, authentication/authorization, Excel/PDF exports, legacy maintenance, and practical full-stack delivery.

CORE SKILLS

Backend C#, .NET 8, ASP.NET Core, ASP.NET MVC, EF Core, LINQ, REST APIs, Go	Frontend React, TypeScript, JavaScript, Vite, Tailwind CSS, Ant Design, Razor, jQuery
Data & Auth SQL Server, PostgreSQL, SQLite, JWT, RBAC, OTP login, password hashing	Delivery Docker basics, GitHub Actions, Git, IIS, backup/restore, health checks
Reporting Excel export, PDF generation, filtered reports, payment/business reports	Libraries MediatR, Serilog, FluentValidation, xUnit, Moq, ClosedXML, QuestPDF, ExcelJS

EXPERIENCE

Full-Stack Developer / Enterprise Systems Contributor

Shwe-Digits organization projects | Enterprise trade, e-commerce, customs/reporting, and Tradenet-related systems

- Built and maintained backend and frontend features across ASP.NET Core APIs, ASP.NET MVC/Razor, React/TypeScript admin portals, and reporting interfaces.
- Implemented OTP login, email OTP verification, user activation checks, and role-based access control for business registration systems.
- Built filtered reporting APIs, frontend report pages, Excel export flows, approval/rejection workflows, appeal handling, extension search, payment reports, and file attachment flows.
- Contributed to Tradenet 2.0 oversea member-management workflows, including sub-member edit, email/password edit, activation/deactivation, validation, and active-member limits.
- Fixed production-style workflow issues around query conditions, exact-date search, UI state, responsive layouts, signup duplication, and table/list behavior.

Technologies: C#, ASP.NET Core, ASP.NET MVC, EF Core, SQL Server, React, TypeScript, Ant Design, Razor, jQuery, DataTables, ExcelJS, JWT, OTP, Git

Backend / Full-Stack Project Contributor

one-project-one-month organization projects | LMS, online job finder, and tested .NET backend systems

- Implemented JWT authentication, token generation, token refresh, role claims, registration/login endpoints, Swagger bearer authentication, BCrypt password hashing, and request validation.
- Built recruiter/company profile services, job management models, job application workflows, status updates, and company review features.
- Worked with authenticated user claims to enforce ownership and role-specific behavior in .NET backend systems.

Technologies: C#, .NET, ASP.NET Core, EF Core, JWT, BCrypt, FluentValidation, SQL Server, Swagger

SELECTED PROJECTS

Restaurant POS System

github.com/Eulean/POSFORRESTURANT

- Full-stack POS with authentication, RBAC, orders, kitchen workflow, payments, inventory, receipts, reports, backup/restore, health checks, and deployment notes.
- Verified locally with a successful .NET solution build.

Technologies: .NET 8, ASP.NET Core, SQLite, EF Core, React, Vite, QuestPDF, ClosedXML

Tradenet 2.0 Oversea Member Management

Private organization project; internal details summarized for confidentiality

- Added sub-member account edit workflow with edit email/password screens, MVC controller actions, repository HTTP calls, and AJAX form handling.
- Added DataTables action dropdowns and enforced maximum active sub-member rules in UI and server-side logic.

Technologies: ASP.NET MVC, C#, Razor, jQuery, DataTables, SweetAlert, REST integration

Enterprise E-Commerce / DOCA / DOCCA Workflows

Private organization projects; summarized for confidentiality

- Implemented OTP login, admin email OTP, role-based authorization, filtered report APIs, appeal workflows, extension search, and payment report pages.
- Improved business-name/application-number search and fixed approval/rejection list behavior.

Technologies: ASP.NET Core, EF Core, React, TypeScript, Ant Design, SQL Server, JWT, OTP, Excel export

Safety Data Sheet / PDF Generation

github.com/Eulean/SafetyDataSheet

- Built ASP.NET Core MVC/Razor functionality for structured safety data sheet information, EF Core migrations, and PDF generation workflows.

Technologies: ASP.NET Core MVC, Razor, EF Core, SQL Server, PuppeteerSharp

Go Backend Practice

github.com/Eulean/goRelated

- Built Go/Gin backend practice with authentication-oriented structure, handlers, services, repositories, PostgreSQL, JWT, rate limiting, and Docker support.

Technologies: Go, Gin, PostgreSQL, JWT, Docker

EDUCATION

-
- Bachelor of Science in Botany.
 - Computer Science coursework, University of the People - currently attending.
 - Java Development Course Bootcamp (JDC), Myanmar.

AVAILABILITY

Available for remote full-time, part-time, freelance, or contract software development roles.
